

ALL CLEAR®

ALL CLEAR is a unique, ammonia-free spray tank decontaminator utilizing a dual mode of action. No pesticide is too sticky or too difficult for **ALL CLEAR**.

PRODUCT BENEFITS

- Offers a dual mode of action
 - Surfactant to physically remove residues
 - Degradant to chemically break down residues
- Easy-to-use liquid formulation
 - Convenience over dry products
- Economical application rate
- User-friendly with no ammonia

APPLICATION INFORMATION:

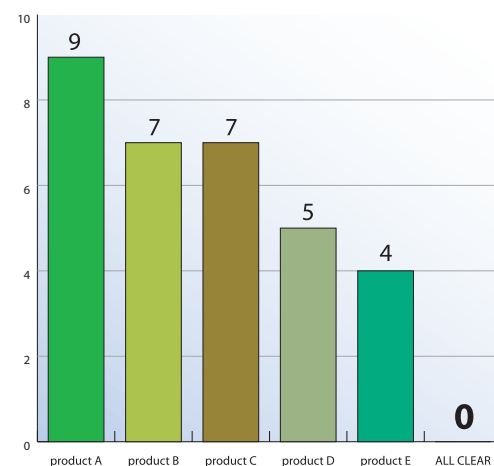

For use with:

- Glyphosate, dicamba and many others
- Phenoxys (like 2,4-D)
- Sulfonylureas
- Triazoles
- Carfentrazone-ethyl

APPLICATION RATES:

1 - 2 qts per 100 gallons

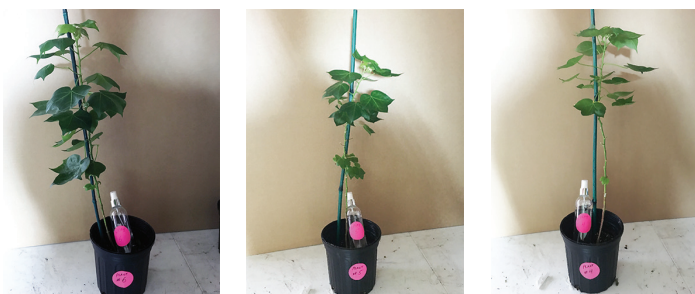

Spray tank cleaned with ALL CLEAR didn't contain sufficient herbicide residues to burn test plants

DICAMBA RESIDUE TEST ON GLYPHOSATE-TOLERANT COTTON:

- Dicamba product (25% concentration) was held in two tanks for 24 hours.
- Each tank was triple-rinsed.
 - Tank 1: Water only
 - Tank 2: Rinsed once with **ALL CLEAR** (0.50% decontamination rate)
- After rinsing, the jugs were refilled with water and sprayed on cotton plants to test for dicamba residue.

Time Elapsed	Tank 1: Water Only	Tank 2: ALL CLEAR decontamination rate
8 hours	Stress begins to show	No signs of stress or damage
24 hours	Severe wilting occurs	No signs of stress or damage
48 hours	Severe leaf loss occurs	No signs of stress or damage

Tank 2: 48 hours after treatment, plants show no signs of stress or damage.
