

HI-WETT® is an organosilicone based super-spreader designed specifically for the application of contact crop protection products. HI-WETT is a blend of organosilicone and other organic fluids formulated to not only give super-spreading properties on plant foliage, but also to improve the retention and deposition of spray droplets on all plant surfaces.

### **GROWER BENEFITS:**

---

- Increased deposition of chemical on the plant for the same chemical input
- Increased disease and pest control due to better coverage and deposition
- Potential use of less water or improved performance of low volume applications
- Time and equipment efficiencies due to better man-power utilization and more acres sprayed in a day
