

NEED FOR SPEED PROGRAM

Provides consistent, firm and fast greens players want!

The Right Track for Faster Greens on Your Course

The pace of everything is quicker these days and that includes the demand for greens speeds. Now you can meet that **Need for Speed** with the combination of two Loveland brand products **SST® Silica 28%** and **Maximum N-Pact® K** driving your nutritional program.

These exclusive Loveland Products combine all of the known benefits of Stabilized Silica Technology with the increased uptake of Potassium Acetate. Together, **SST Silica 28%** and **Maximum N-Pact K** will produce the consistent fast and true ball roll that players demand on a daily basis. Silica and Potassium promote plant health care and better cell wall development.

In combination, **SST Silica 28%** and **Maximum N-Pact K** are like race cars drafting for optimum performance. Greens obtain the desired density and speed, making you the winner.

28% Silica

28% Silica

SST delivers PERFORMANCE in three ways:

- Increased plant uptake
- Increased compatibility for greater tank mix flexibility
- Stable in a spray solution at a pH of 3-12, versus other silica products that are only stable at a pH of 7-11

Rates: 1-2 applications before a tournament or apply weekly to improve overall roll and plant strength with the products listed below.

Maximum N-Pact K: 7-10 oz /1000 sq ft

SST 28% Silica : 0.5-2 oz /1000 sq ft
