

# RESPOND<sup>®</sup> 3

## AVAILABLE FORMULATIONS:

- LIQUID
- GRANULAR
- TABLETS

The Respond<sup>®</sup> 3 family of products are premium, multi-functional wetting agents for improving water penetration and treating localized dry spot, compaction and drought stress on turfgrass.

## FEATURES:

- Helps water initially penetrate into areas which have over dried and become hydrophobic
- Ensures moisture is available in the entire root zone
- Superior performance through the use of three surfactant blends unlike many products that rely on a single surfactant technology
- Safe to use
- Provides an easy method of treating areas with flexible use rates and application methods

## APPLICATION INFORMATION:

RESPOND 3 (LIQUID)		
	Corrective Program	Maintenance Program
Sand based mixes and native sandy soils	4 oz per 1,000 square feet followed by 4 oz per 1,000 square feet every 14 days thereafter	4 to 6 oz per 1,000 square feet every 30 days
Heavy, non-sandy soils	4 oz per 1,000 square feet followed by 4 oz per 1,000 square feet every 14 days thereafter	2 to 4 oz per 1,000 square feet every 30 days

RESPOND 3G (GRANULAR)		
Managed Application Program	Intensive Split Dose Application Program	Curative Application Program
1.5 lb per 1,000 square feet; 2 applications at 14 day intervals in early season followed by 1 lb per 1,000 square feet monthly as needed	A 3 lbs per 1,000 square feet early season application followed by 1.5 to 3 lbs per 1,000 square feet mid-season application	1.5 lb per 1,000 square feet as necessary, repeat at 10 to 14 day intervals

RESPOND 3 TABLETS
Specifically designed for spot treatment of affected areas through the proper hose-end applicator. The RESPOND 3 TABLET is inserted into the applicator vessel of the hose-end device and as water pours over the tablet, it slowly dissolves. Rate of dissolution will depend upon water pressure and water temperature. One tablet should be enough to cover one golf green in 20 to 30 minutes, or alternatively, spot treat 6 to 7 golf greens.
